

Mission Healthcare at Bellevue Awarded National Excellence in Action Quality Award

October 17th 2007, Bellevue, WA—Mission Healthcare at Bellevue was awarded My InnerView's Excellence In Action award, a national award recognizing the nursing home's commitment to quality. Only 380 nursing homes throughout the country received the award this year.

The award recognizes those nursing homes that have made a commitment to continuous quality improvement and have successfully made quality a priority to better serve their customers' needs. Mission Healthcare at Bellevue received the award through their continued excellence in customer service during 2006.

“This year's award recipients demonstrate world-class performance excellence,” said Brad Shiverick, Chief Quality Officer, My InnerView. “These nursing homes are committed to delivering an exceptional standard of care to their customers.”

My InnerView, the applied research and quality management company that presents the award, supports leaders across the entire assisted living, senior housing and skilled nursing profession with tools to measure, benchmark and improve performance.

Mission Healthcare at Bellevue has been a part of the community for ten years. The nursing home specializes in Comprehensive Post-Operative Care, Long Term and Respite Care, Outpatient and Home Health Services.
